

Winter Checklist

- Protect entryway floor from ice, snow, and road-salt by using floor mats both inside and outside of each entrance.
- Make sure to take the sump pump's discharge hose off.
- Be prepared for potential power outages. Put a kit together.
- Remove window screens to avoid trapped snow between the screen and window.
- Remove garden hoses from faucets.
- Make sure your heating system is running smoothly.
- Remove snow and ice from external vents.
- Stop ice dams from forming.
- Inspect insulation.
- Protect your A/C unit (You can use a sheet of plywood, tarp or plastic sheeting to cover the top).
- Protect your patio furniture.
